

Professional statement outline

To develop a professional statement that briefly explains who you are and what you are passionate about, follow the steps outlined.

Note: You will need a piece of paper or a blank word processing document to complete this activity

Step one

List two to three strengths that you currently have or are committed to developing (e.g., strong written and verbal communication, time management, programming, etc.).

- Strong analytical and problem-solving skills
- Technical knowledge (e.g., system analysis, database management)
- A commitment to continuous learning

Step two

List one to two values you have (e.g., protecting organizations, protecting people, adhering to laws, ensuring equitable access, etc.).

- Protecting organizations from digital threats
- Upholding data privacy and ensuring ethical use of technology

Step three

Ask yourself some **clarifying questions** to determine what to include in your professional statement:

1. What most interests me about the field of cybersecurity?
 - I am interested in applying my Information System background to solve complex security challenges and protect critical data.
2. Who is the audience for my professional statement (e.g., cybersecurity recruiters, specific organizations, government employers, etc.)?
 - Recruiters and hiring managers in IT, data security, or risk analysis departments.

3. In what ways can my strengths, values, and interest in cybersecurity support the security goals of various organizations?
 - My foundation in information systems from UTA gives me the skills to help identify vulnerabilities, improve data protections, and contribute to a secure digital space.

Draft Professional Statement

My name is Satchit Basnet, a senior at the University of Texas at Arlington majoring in Information Systems. I am passionate about protecting organizations from digital threats and ensuring the ethical use of technology. To build upon my degree, I am seeking an internship to strengthen my skills in safeguarding systems and data. My goal is to secure an entry-level position where I can apply analytical thinking, technical knowledge, and problem-solving skills to help an organization stay secure in an ever-evolving digital world.
